ABOUT THE WORKSHOP:

Local Educational Agencies are receiving an ever-increasing number of complaints from employees and members of the public, which require lawful and thorough investigations. This presentation will guide attendees on key policies, regulations and laws surrounding complaints. Our presenter(s) will also share their direct experience with handling investigations—interviewing witnesses, reviewing evidence, generating the investigation report and making the findings and recommendations necessary. Each attendee will learn about investigation best practices, Weingarten and Representation rights, interview techniques, findings and conclusion determinations, and some key considerations to assist in how to draft an investigation report.
